

Stone | EDGE SURFACES

Professional Grade Concrete Overlays

DESCRIPTION

Stone Edge Surfaces Polymeric Paver Sand is non hazing, virtually no dust, fine sand paver and tile joint filler...that has consistent sand color throughout (not salt and pepper).

Our Polymeric Paver Sand is 100% polymeric sand, with NO Cement, NO Liquid Epoxy and NO Acrylic Concentrate to float to the surface and carry sand grains over the pavers or tile to create a film or haze. Our Polymeric Paver Sand is permeable and percolates to allow water to pass through, and it's self-healing, flexible, locks in joints better, and is an ant and weed deterrent with superior bonding properties and longevity.

MOST COMMON USES

- Polymeric Paver sand for Travertine and other light color paver types

APPLICATION

BASE/TOP COAT: Hardened joint filler, fine joint sand, and polymeric sand

APPLICATION METHOD: Pour Polymeric Paver Sand onto dry pavers and sweep into the joints. Tap on the pavers to get sand to settle into the joints. Brush or sweep all sand off the pavers. Lightly spray water over the pavers. Water, the just sanded paver area for about 10 seconds at a time. Allow 24 hours before foot traffic.

WORKING TIME: Long working time as long as it is kept dry

COMMONLY APPLIED IN THE JOINTS OF:

- Travertine Pavers
- Concrete Pavers
- Tile

COVERAGE:

Polymeric Sand Coverage (Estimates)		
AREA SQFT	JOINT SIZE	
	Number of Bags Needed at Joint Width of:	
	Up to 1/8"	1/4"
50	0.75	1
100	1.5	1.75
150	2	2.5
200	2.75	3.25
250	3.5	4
300	4	4.75
350	4.75	5.5
400	5.5	6.25
450	6	7
500	6.75	7.75

These coverage rates are ONLY estimates and not guaranteed as quantity of polymeric sand needed will vary depending on the actual depth and width of the joints and on the overall size of the individual pavers used.

POLYMERIC paver sand
